

# KLT Doctrine Publication Execution Log RU/EN v8.9

Ivan Borisovich Kurpishev / Иван Борисович Курпишев  
Independent Researcher, Kaliningrad · me@kurpishev.ru  
KLT-DOCTRINE-FINAL-MONOGRAPH-PUBLICATION-EXECUTION-LOG-RU-EN-v8.9

## 1. Status / Статус

The v8.9 package fixes the publication execution log after the v8.8 freeze. It is a runbook and evidence shell for manual publication, not a claim that site, DOI or arXiv publication has already occurred.

Точка v8.9 фиксирует журнал исполнения после freeze v8.8. Это инструкция и доказательный контур для ручной публикации, а не заявление о том, что сайт, DOI или arXiv уже опубликованы.

Current status: READY\_FOR\_MANUAL\_EXECUTION\_NOT\_PUBLICLY\_VERIFIED.

Blocked status: VERIFIED\_PUBLIC remains blocked until remote URLs and remote checksums are inserted.

## 2. Source freeze check

Source	Declared SHA256	Actual SHA256	Result
v8.8 publication freeze package	df8bbbeac5e09be0f60e05a2a1271ff590c503a78d87bf726b411ee34f6755d2	df8bbbeac5e09be0f60e05a2a1271ff590c503a78d87bf726b411ee34f6755d2	PASS

## 3. Doctrine control law

C@C -> Rep(R,I,U;D) -> lambda -> CGI -> Status -> RBD

Publication status obeys the same rule: without remote domain evidence and sufficient publication foundation D\_pub, the status remains control/gap/candidate, not VERIFIED\_PUBLIC.

## 4. Execution log

step_id	route	action	status	evidence
EXE-01	local freeze source	load v8.8 freeze package	PASS	source_v8_8 folder + sha comparison
EXE-02	kurpishev.com	manual upload of selected public payload	NOT_EXECUTED_IN_THIS_ENVIRONMENT	URL field intentionally empty
EXE-03	kurpishev.com	open public RU/EN landing pages after upload	WAITING_FOR_REMOTE_URL	remote URL required
EXE-04	DOI repository	deposit metadata and selected frozen payload	NOT_EXECUTED_IN_THIS_ENVIRONMENT	DOI URL/record absent
EXE-05	arXiv/source handoff	select source package and prepare submission record	NOT_EXECUTED_IN_THIS_ENVIRONMENT	arXiv ID absent
EXE-06	post-execution verification	download remote objects and recheck SHA256	BLOCKED_UNTIL_REMOTE_PUBLICATION	remote checksum required

## 5. Operator checklist

check_id	phase	task	status	evidence
OP-01	pre-upload	confirm v8.8 package	PASS	df8bbbeac5e09be0f60

		SHA256 equals freeze ledger		e05a2a1271ff590c503a78d87bf726b411ee34f6755d2
OP-02	site upload	upload selected public ZIP/PDF/DOCX/landing text to short public paths	PENDING_OPERATOR	manual hosting panel
OP-03	site upload	avoid private/internal source packages in public folder	PENDING_OPERATOR	public/private split check
OP-04	site verification	open public RU landing page	PENDING_REMOTE_URL	URL + screenshot/checksum
OP-05	site verification	open public EN landing page	PENDING_REMOTE_URL	URL + screenshot/checksum
OP-06	DOI deposit	deposit metadata only after public payload selection	PENDING_OPERATOR	repository record
OP-07	arXiv handoff	select TeX/PDF source and confirm category policy	PENDING_OPERATOR	arXiv draft/submission id
OP-08	final lock	insert remote URLs and recompute remote SHA ledger	BLOCKED_UNTIL_REMOTE	v9.0 evidence insertion

## 6. Site / DOI / arXiv routes

Site upload, DOI deposit and arXiv handoff are separated so that no route receives an unsupported public status.

site_id	object	local_source	upload_status	post_check
SITE-01	RU landing page	LANDING_PAGE_TEXT_RU_v8_4.md / v8.8 freeze	PENDING_OPERATOR	WAITING_FOR_URL
SITE-02	EN landing page	LANDING_PAGE_TEXT_EN_v8_4.md / v8.8 freeze	PENDING_OPERATOR	WAITING_FOR_URL
SITE-03	public transport ZIP	KLT_DOCTRINE_PUBLICATION_TRANSPORT_RU_EN_v8_4_PACKAGE.zip	PENDING_OPERATOR	WAITING_FOR_URL_AND_SHA
SITE-04	publication freeze status PDF	KLT_DOCTRINE_PUBLICATION_STATUS_FREEZE_RU_EN_v8_8.pdf	PENDING_OPERATOR	WAITING_FOR_URL_AND_VISUAL_OPEN
doi_id	object	local_source	execution_status	claim_status
DOI-01	metadata record	DOI_DEPOSIT_METADATA_RU_EN_v8_6.json	PENDING_OPERATOR	NO_DOI_CLAIMED
DOI-02	payload attachment	selected public payload from v8.8	PENDING_OPERATOR	NO_DOI_CLAIMED
arxiv_id	object	local_source	execution_status	claim_status
ARXIV-01	source handoff	ARXIV_SOURCE_HANDOFF_RU_EN_v8_6.md + selected TeX/PDF	PENDING_OPERATOR	NO_ARXIV_ID_CLAIMED
ARXIV-02	submission package	selected monograph volume/source bundle	PENDING_EDITORIAL_SELECTION	NO_ARXIV_ID_CLAIMED

## 7. URL evidence register

evidence_id	channel	item	evidence_status	upgrade_rule
URL-01	site	RU landing page	EMPTY_PENDING_MANUAL_INSERTION	required for VERIFIED_PUBLIC
URL-02	site	EN landing page	EMPTY_PENDING_MANUAL_INSERTION	required for VERIFIED_PUBLIC

URL-03	site	download ZIP	EMPTY_PENDING_M ANUAL_INSERTION	required for VERIFIED_PUBLIC
URL-04	DOI	repository record	EMPTY_PENDING_M ANUAL_INSERTION	required for VERIFIED_PUBLIC
URL-05	arXiv	submission record	EMPTY_PENDING_M ANUAL_INSERTION	required for VERIFIED_PUBLIC

## 8. Gate decision

The v8.9 package is accepted as a local execution-log and operator handoff package. It is not accepted as evidence of external publication until URL evidence and remote SHA256 verification are added.
